Your Resource for Daylight and Natural Ventilation

Save Energy, Increase Occupant Productivity & Well-Being

At Sun West Distributors, Inc. we strive to provide one-stop service from conceptual design, through construction and occupancy. Let us help you on your next project. We are the authorized commercial distributor of Solatube Tubular Daylighting Devices. We can assist with photometric daylighting layouts, construction documents, sustainability goals, bids and installation.

The Solatube products:

- Eliminate the need for electric lights during the day
- Deliver superior light quality without solar heat gain
- Are cost-competitive with other fenestration products
- Are American-made, manufactured in Vista, CA
- Can contribute to multiple LEED credits

“Sun West provides quality products, professional support, and cost-effective solutions.”

***- Sandy Houck, LEED AP BD+C, LC
Brummitt Energy Associates, Inc.***

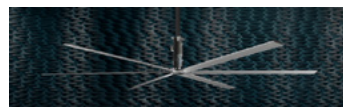

Many studies prove daylighting can have a positive impact on student test scores, employee productivity, retail sales, and building value. Daylighting goes beyond just energy efficiency, helping to promote the human performance factors that increase the return on your investment.

Sun West Distributors, Inc. can also support natural ventilation designs with the best HVLS (High Volume Low Speed) fans. MacroAir is the originator of this building product, and they continue to improve on their design. The fans move more air with less energy and are strong, yet lightweight. Reliability, durability, and cost savings are just a few of the advantages of the MacroAir fans.

Contact us with any questions, or if you would like more information. We also offer educational lunch and learn presentations for AIA and LEED AP CEUs!
